

CARF Behavioral Health Standards 2025-2026

Relias offers online learning, staff compliance training, and continuing education for behavioral health organizations.

Relias Training Crosswalks are based on published accreditation standards. They are designed to assist organizations in the selection of courses from the Relias libraries to ensure and demonstrate staff competence according to the training standards. In some cases, it may be useful for customer organizations to develop training specific to the organization's individual needs.

General staff compliance trainings should be selected to ensure the organization meets OSHA and other regulatory requirements. Staff training is only one element of a successful survey and the crosswalks are not meant to take the place of a careful review and evaluation of your program to the accreditation standards.

The courses listed in the crosswalk are a representative sample of courses available in Relias libraries. It may not be necessary to choose all courses listed for a specific training standard; it is recommended that courses are chosen that closely align with the mission and services offered and the specific needs of the persons served.

Disclaimer: The following constitutes Relias, LLC's recommendation of course work for each listed Crosswalk Measure. Relias does not make any guarantee that such course(s) will be accepted by the accrediting body(ies).

CARF does not endorse the Relias product or services that Relias provides and this document's sole purpose is to only provide recommendations.
